

Gary Burkholder is the Experienced Leadership Etna Township Needs

Gary can hit the ground running **Day One** because of his extensive local government and business experience. As a 20 year resident of Etna, Gary knows the township. For the last 20 months, Gary has been advocating for the residents of Etna Township. Gary isn't just talking about what he will do, he is already championing the best interests of the Etna residents.

Gary is:

- Attending in person all the Etna Citizen Advisory Committee Land Use meetings calling for land use changes which will protect the township from additional warehouses and help guide proper growth
- Attending Water and Sewer District meetings engaging the board and demanding accountability and transparency
- Attending County Commissioner meetings along with residents pushing for the county to enforce and resolve the development violations at the Scannell/FedEx site affecting adjacent residents
- Supporting an Etna resolution to prevent industrial-sized solar farms in Etna Township

Gary Burkholder will continue to work hard as an Etna Township Trustee for our township residents and businesses as an experienced leader.

Day One Agenda. **Day One** Gary Burkholder will:

- **Restore professionalism, civility and decorum** to the Township Meetings
- **Work collaboratively** with the other trustees to get Etna Township back on track
- **Ensure equality**, allowing all trustees the opportunity to place items on the township agendas
- **Encourage resident engagement** by discussing concerns and accepting input from residents
- **Post ALL township board, commission and committee member vacancies** allowing all residents an opportunity to apply
- Begin the process of **modernizing our zoning code** so we can protect our community
- **Restore transparency, organization and access** to the township's records
- **Restore the township's video security system** which has been missing for nearly a year
- Continue to **hold the Water and Sewer District Board accountable** demanding more transparency
- **Release and review the energy aggregator fee documents** to verify they did not overcharge our residents
- Submit a resolution asking the County Commissioners to **protect Etna Township from industrial solar development**
- **Limit outside legal counsel expenses**, using the free county prosecutor where necessary
- **Restore all township reports** to the board and public at trustee meetings

With the support of the other two trustees, these are just a few of the items we can accomplish on **Day One**.

Follow on Facebook and the website where issues, goals, activities, and events will be posted.
